

CONFLICTS OF INTEREST

Series of Jojo. A way to disseminate HIV Cure information in a Community language.

Josephine Nabukenya.
Miles of Smiles Foundation Uganda
2018 HIV Cure fellow and grantee.

Community Language

Is the use of words that can be understood by *everyone*.

It involves ensuring that *clear communication* is done so that everyone fully understands what has been said.

- Everyone
 - Scientific community
 - Journalists
 - PLHIV
 - Lay person.
- Therefore simplified non scientific words are needed as much as non scientific images.

The process.

- Basic HIV Cure workshop was held for 10 young people in Kampala.
- Created a WhatsApp where we held discussions on how to simplify the science and how to present it.
- Developed illustrations and animated videos to deliver the information.
- Disseminated the work on our personal social media channels which has reached;
 - Facebook 1331 views and 679 shares,
 - Instagram 719 likes,
 - Youtube 896 views
- Distributed the illustrations, animated videos in HIV clinics with youth friendly corners and held HIV Cure discussion with over 300 AYPLHIV.

Some of the terms Simplified include;

- CD4 Body soldiers
- Latency. Sleep mode
- Receptors. Cell doors
 - CCR5. Open cell doors to HIV
 - CCR5 Δ 32. Closed cell doors to HIV
- Reservoir sites. HIV hiding places
- Sanctuary sites. HIV restricted places

CCR5 AND CCR5 delta 32 illustrations.

2 ABOUT 1% OF THE GLOBAL POPULATION, HAVE A CHANGE (MUTATION) IN THEIR DNA THAT DOESN'T CODE FOR THE CCR5 DOOR. THEY HAPPEN TO BE NATURALLY IMMUNE TO HIV.

HIV USES A SPECIFIC DOOR CALLED CCR5, TO GET INTO A CELL

RESEARCHERS MODIFY DNA TO MAKE CELLS RESISTANT TO HIV, SIMILAR TO THE BERLIN PATIENT TIMOTHY BROWN

HIV CURE
STRATEGIES

Where we are now?

- 2 more HIV Cure related videos have been animated under the Cure Roar program.
- Independent series of Jojo platforms were created last month that is Facebook page and YouTube channel
- AYPLHIV are able to contribute to HIV Cure discussion with a basis of the basic knowledge acquired by either being part of the team or watching the videos created so far.

HIV Life cycle video

**COMMUNITY SUMMARY**

People living with HIV have to motivate HIV Cure research that way,

Involvement

Catalyse the process through advocacy

Embrace the available options in regards to Prevention and management.

And for the Series of Jojo team, we are open to simplify more HIV Cure work and open to translate the current HIV Cure videos into local languages. Reach out to us and we will work with together.

Thank You!

- Series of JoJo Working Group.
- Dr. Henry Mugerwa from JCRC.
- Miles of Smiles Foundation.
- MUJHU Care limited
- Towards an HIV Cure Academy
